come over and discover the hacker ethics for yourself :

Access to computers should be unlimited and total.

All information should be free

Mistrust authority—promote decentralization

Hackers should be judged by their hacking,

not criteria such as degrees, age, race, sex, or position.

You can create art and beauty on a computer.

Computers can change your life for the better.

and no, we're not  
always \_that serious.

feel free to come over:
